NEW!

Rhino® R3615 Lightweight Aluminum Power Supply Enclosure

The R3615 lightweight aluminum power supply enclosure is the newest addition to Channell's complete line of Rhino fabricated metal enclosures. Similar to Channell's R3618 enclosure, the R3615 is designed for broadband node locations supporting remote deployment of network electronics, including power supplies and batteries.

The all-aluminum R3615 enclosure has similar features found in our popular Rhino line. The enclosure provides an air intake scoop for the power supply fan, plus air intake and exhaust vents to assist in dissipating heat from the enclosure. The enclosure is protected with polyester electrostatic powder paint. Additional features include locking options, multiple power access and electrical options, slide-out battery shelves, a generator access door, power indicator lights, battery harnesses, a coaxial cable connector box and a tamper switch.

Applications

Designed for broadband node networks deploying remote powering with battery backup.

Features

- Lightweight, all aluminum construction
- Polyester electrostatic powder paint
- Excellent heat dissipation
- Slide out battery shelves
- Battery harness
- Power supply fan air intake scoop
- Generator access door
- Power indicator lights
- Coaxial cable connector box for Alpha or Lectro
- Tamper switch

Specifications

Dimensions: 36" tall, 15" deep, 27" wide
Shipping: 1 unit per pallet
Weight: 76 lbs
