

G4 GREEN HORNET ENCLOSURE

4" Series

The G4 splice closure is a high performance, low cost splice closure capable of performing in the harshest environments. It excels in underground/vault applications, pedestal application and aerial deployments.

The G4 is a butt splice closure with a capacity of 48 splices that can be used in straight or branch applications. The G4 is ideal in FTTH applications where up to eight (8) drops can be deployed via four (4) drop cable ports.

The G4 has an oval main cable seal enabling mid-sheath cable splices where uncut fibers are stored and expressed through the closure.

The G4 can be deployed with adapter arrays housing up to eight (8) SC connectors or sixteen (16) LC connectors.

Channell's grommet seal technology provides easy cable installation, robust sealing and cable retention. The G4 grommet technology is capable of sealing on all types of cable.

The G4 splice closure may be ordered packaged with a pedestal or grade level vault delivering the best overall value.

FEATURES

- **Environmentally Sealed: Air Water Tight**
- **Craft-Friendly Design**
- **Quick and Tool-less Installation**
- **Re-enterable and Re-useable**

TESTING SPECIFICATIONS

- **Meets Test Standards of GR771, IP68, and IEC 61300**
