

## LEGACY PEDESTAL HOUSING (LPH)

LPH12123, LPH12126

LPH 12123

LPH 12126

Known to the broadband world as Channell's MAH series, Channell is proud to announce the new and improved LPH (Legacy Pedestal Housing). This housing series has been, and continues to be the standard in outside plant. Channell's free-breathing pedestal enclosures are available in a wide range of sizes and configurations. They are constructed of rugged, high-performance thermoplastic material and designed to be craft-friendly.

### FEATURES

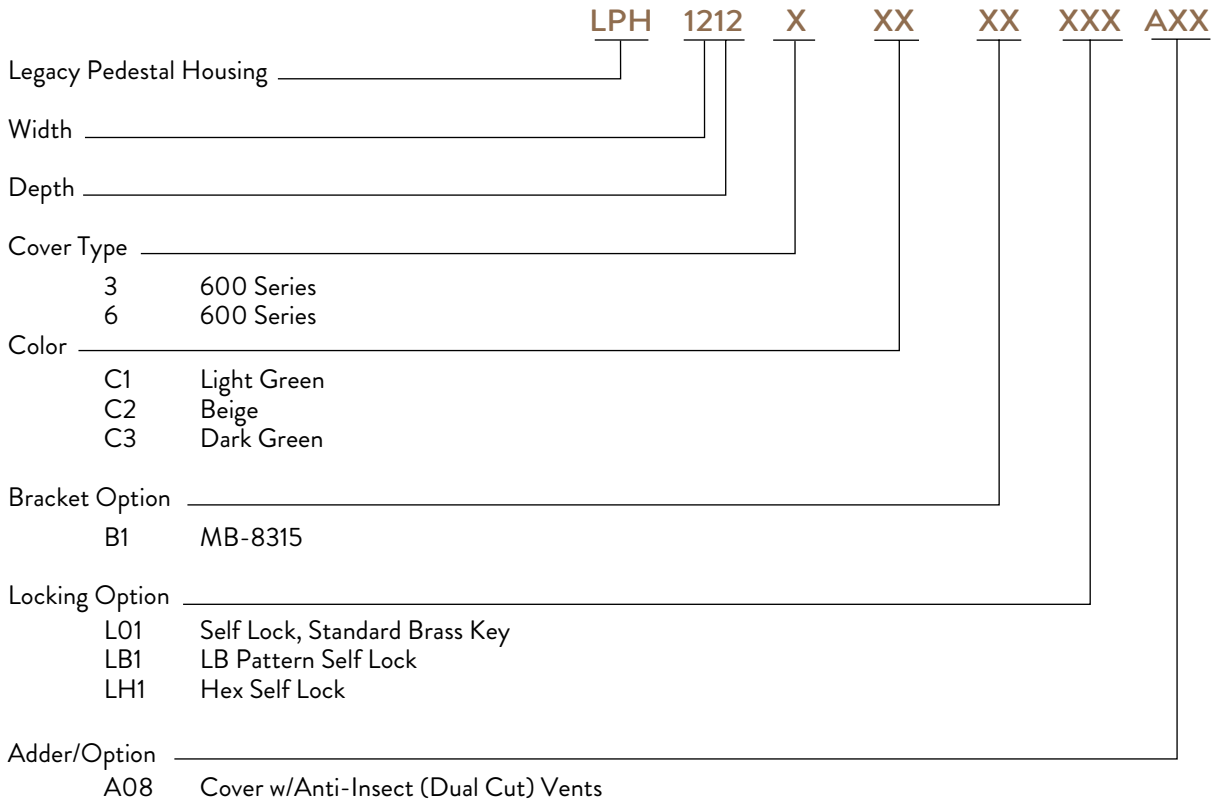

- Fully modular and designed to support a full range of both broadband and narrowband network applications for copper, coax, and hybrid fiber/coax system installations
- Engineered to be cost effective for both new installations and future upgrade programs, LPH Series enclosures provide configurations for splicing, cable management, and loop electronics deployments
- Factory equipped heavy gauge steel support structures are protected with 3M Powder Coating. Oversized, overlapping cover designs accommodate multiple conduit entrances and provide a solid mounting foundation, without the need of additional mounting stakes

# TESTING SPECIFICATIONS

- Designed to meet Bellcore GR-13 requirements and feature full 360 degree working access and Channell's Self-Lock self-latching cover system. Channell's Heat Dissipation Covers (HDC) safeguard the performance of enclosed electronic equipment.

*Looking for a fully fiber application? Check out the OP (Optimus Pedestal) line.*
