

HARTLAND ROUND FIBER PEDESTAL

HFP / HRP / HFC / HRC

The HartLand Round Fiber Pedestal (HRP/ HFP) is the newest addition to Channell's modular pedestal product portfolio and utilizes the same field-proven, fiber assembly solutions as found in our other products such as the GOAT, G5N closures, and Yellow Jacket aerial terminals.

The HRP/HFP pedestals combine an innovative cover and collar which is designed to mate with the HartLand Round Vaults (HRV) by simply snapping in the collar in mere seconds.

The pedestals are also capable of housing other fiber apparatus such as G4N/G5N closures, Mini-G terminals, and "C" Turtle NIDs to maximize flexibility in any field application. An integrated winterized drop port on the collar provides the ability to install temporary drops for quick-turn up service.

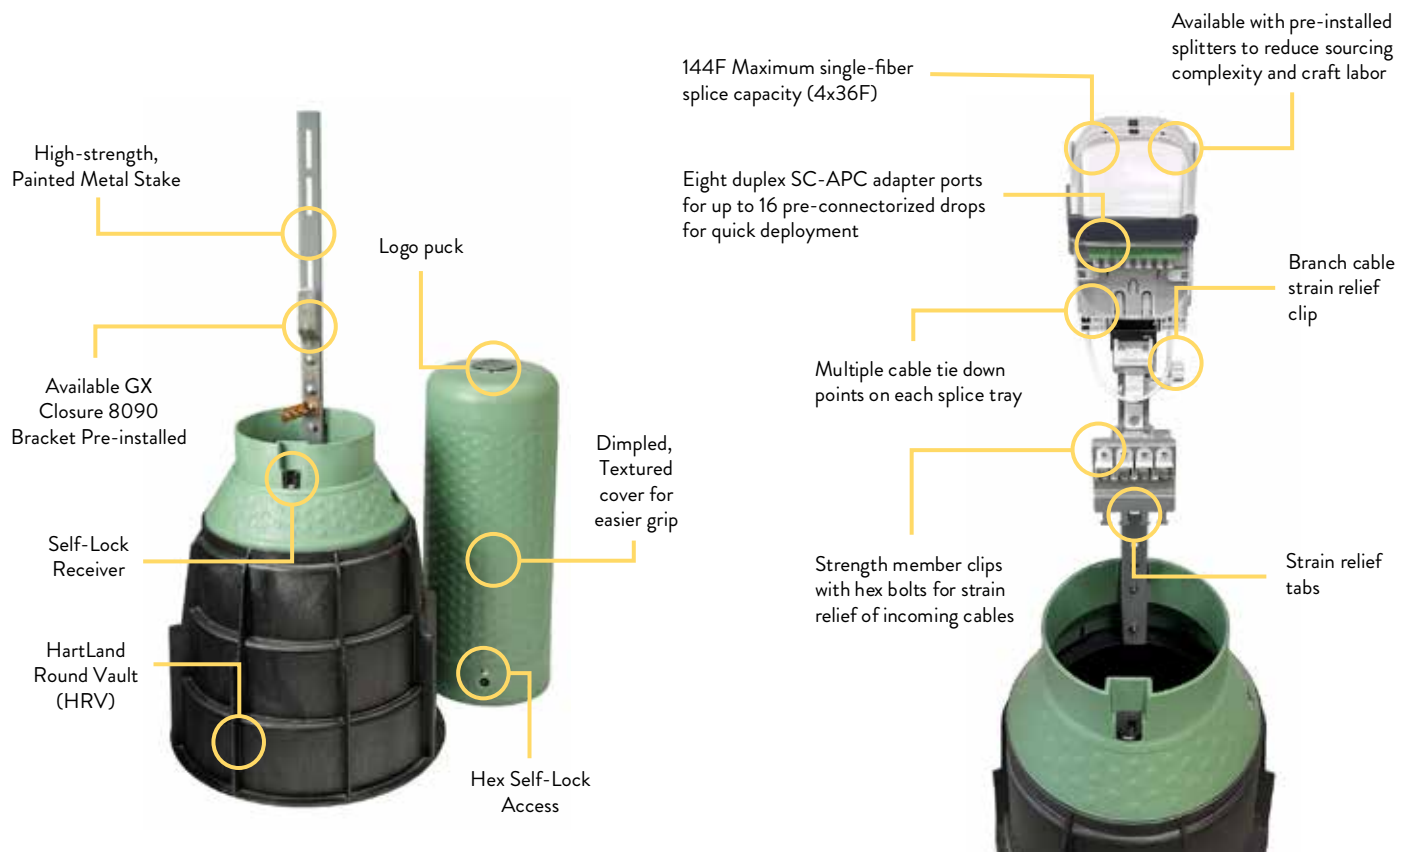

FEATURES AND BENEFITS

- Ergonomic round design with standard can-wrench access
- Compatible with Channell Universal Splice Tray (UST) and PLC splitters
- Detachable collar/cover and convertible to stand-a-lone underground vault
- Toolless collar snap-in installation
- Cover/collar design can be added in the future for easy upgrades
- Slack storage capability inside vault provides ample space
- Dimensions:
 - HFP10/HRP10 — 47”H x 20” Dia. (with vault)
 - HFC10/HRC10 — 31”H x 14.5” Dia. (cover-collar only, no vault)

Toolless Snap-in Collar Design
